TEMPLATE.NET

**INCIDENT REPORT FOR PATIENT AND VISITOR**

**POLICY:** Incident report data (eFeedbackNOW and associated documents) are confidential and completed as a notification, data management, trending, and prioritization tool for Quality Improvement (including Risk Management) in patient care and staff and visitor safety.

**PROCEDURE:**

1. **Definitions**
  - A. "Patient safety incident" is any unexpected event not related to the patient's underlying condition or cure, regardless of cause or outcome, which compromised a patient's safety.
  - B. "Close call" is a patient safety incident that did not reach the patient and may also be referred to as a "near miss".
2. **Responsibility for Reporting**  
 Any staff who is aware that a patient safety incident, including a close call, has occurred should report it.
3. **Scope of Incident Report**
  - A. The incident report includes data in the software application and associated documents. This tool is for reporting patient and visitor incidents, compliments, and environment of care safety incidents.
  - B. eFeedbackNOW should not be used for the following occurrences that have separate forms and may have other software programs:
    - 1) Occupational illness or injury
    - 2) Security and Fire Safety events
  - C. The incident report is to be used at all licensed sites of Children's Hospital and Regional Medical Center.
4. **Notification and Handling of Incident Report**
  - A. **STAFF/PHYSICIAN INPUTTER**
    - 1) Incidents including close-calls are to be inputted via eFeedbackNOW weblink that is accessible on Children's network desktops, clinical workstations, and mobile units.
    - 2) If the incident is "significant" as deemed by Children's or area criteria, staff

# Incident Report Form

Report any incident including injury, property damage, or youth protection event:  
1. Immediately following the incident, call the Council Office at \_\_\_\_\_  
2. Follow up by immediately completing and faxing this form to council at \_\_\_\_\_

PLEASE PRINT CLEARLY

*NFPA 1500, Chapter 5-3.7.1 and NFPA 1404, Chapter 7-1.2 specify that breathing air used to fill SCBA cylinders should be tested every 3 months by an accredited laboratory. Chapter 7-1.3 specifies that records shall be maintained for each air quality test.*

4) A preventative maintenance program should be established to cover the breathing air compressor, air purification filters, and other equipment used to generate breathing air.

*OSHA 1910.134(f)(5), and NFPA 1404, Chapter 7-2.12 thru Chapter 7-2.14 specify requirements for the operation and maintenance of breathing air compressors and cylinder fill stations.*

5) Records should be maintained for each SCBA which contain the following information:

*NFPA 1404, Chapter 2-2.3 specifies that an individual record of each SCBA regulator and harness assembly shall be maintained. This record shall include the inventory or serial number, date of purchase, date of manufacture, date placed into service, location, maintenance and repairs, replacement parts used, upgrading, and test performance.*

*NFPA 1404, Chapter 2-2.4 specifies that an individual record of each SCBA cylinder shall be maintained. This record shall include the inventory or serial number date of purchase, date of manufacture, date placed into service, location, hydrostatic test pressure and dates, and any inspection and repairs. The hydrostatic test dates shall appear on each cylinder according to the manufacturer's instructions and applicable government agencies.*

*NFPA 1404, Chapter 2-2.5 specifies that an individual record of each SCBA facepiece shall be maintained. This record shall include the inventory or serial number, date of purchase, location, maintenance and repairs, replacement parts, upgrading, and test performance.*

*NFPA 1500, Chapter 2-7.3 specifies that each fire department shall assure that inspection, maintenance, repair, and service records are maintained for all vehicles and equipment used for emergency operations and training.*

*These recommendations are based upon the premise that all SCBA are life-saving devices which will only perform as well as they are maintained. Since they are expected to function and perform properly each time they are used, it is important that SCBA maintenance and inspection be given the utmost priority at the department level.*
